## SUMMARY

I am a Full-Stack Developer with over 1 year of web development experience. I have knowledge in object-oriented programming and data structures, as well as expertise in multiple technologies such as Node.js, TypeScript, JavaScript, React.js, Next.js, Angular, Java, Tailwind CSS, Docker, and Redux. With my experience, I can create responsive web applications using modern technologies and best practices. I stay updated with the latest trends and am committed to delivering high-quality solutions.

## PROFESSIONAL EXPERIENCE

### LAB LDI – 11/2023 – Present

#### *Full-Stack Developer*

Brazilian research and development institute in technology services.

Worked on the Dal platform, a project responsible for developing and maintaining a highly responsive and interactive website, also accessible for visually impaired users to access learning courses in various fields. Main tools: Angular, Java, VsCode, IntelliJ, Docker, Microservices.

Technologies: Docker / Docker Compose / Java / TypeScript / Git / Jira Software / GitFlow / Scrum / Angular

### Grupo Escalada | E-commerce – 06/2023 – 09/2023

#### *Junior Front-End Developer*

Company specialized in solutions and training for e-commerce and marketplaces.

Developed an e-commerce website for product purchases. Applied technologies such as JavaScript, TypeScript, React.js, Next.js for UI, React Native for mobile, Node.js, Tailwind CSS for styling, Git/GitHub for version control, GitFlow, Redux for state management, and SCRUM for agile project management.

Technologies: JavaScript / TypeScript / React.js / Next.js / React Native / Docker / Node.js / Tailwind CSS / Git / GitHub / GitFlow / Redux / SCRUM

### Dell Lead – 06/2022 – 02/2023

#### *Web Developer*

Brazilian research and development institute in technology services.

Project AppTalk: contributed to the development of an innovative application that mediated communication between hearing-impaired users and listeners, eliminating the need for human interpreters. Used technologies such as MediaPipe for sign recognition, Three.js for 3D model animations on the web, React, Styled Components, Docker, Nest.js, RabbitMQ, Jest, and Testing Library.

Technologies: Docker / Docker Compose / Node.js / TypeScript / Git / Jira Software / GitFlow / Scrum / React.js

### DevInDev – Freelancer

### *Front-End Developer*

IT Services and Consulting Company.

Focused on creating a landing page for the SouElo project. Used Docker, TypeScript, JavaScript, Node.js, Git, GitFlow, React.js, and Next.js.

Technologies: Docker / TypeScript / Git / SCRUM / JavaScript / Node.js / GitFlow / React.js / Next.js

## **EDUCATION / CERTIFICATIONS / LANGUAGES**

Bachelor in Systems Analysis and Development – Universidade de Fortaleza (UNIFOR) – Expected Graduation: 12/2026

Udemy Courses: Web Development / Node.js / TypeScript / JavaScript / Python / React.js / Git Version Control / Next.js

Languages: English – Intermediate (reading and conversation), Portuguese – Native

## **TECHNICAL SKILLS**

Frontend: Tailwind / CSS / HTML5 / JavaScript / TypeScript / Next.js / React.js / Angular / Responsive Web Development

Backend: Node.js / Java / JSON / Prisma
